CAREER OBJECTIVE

Electronics and Communication Engineering graduate with practical experience in AI applications, software development, and IoT projects. Seeking an entry-level role to apply problem-solving and development skills in real-world systems. Motivated to learn and contribute to scalable, impactful technology solutions.

SKILLS

Languages	: Python, Java, HTML
AI frameworks	: LangChain, LangGraph, Vector DB (Chroma, FAISS), Streamlit
Tools	: Docker, Git/GitHub, Cursor, AI, N8N, Open AI agent builder
Others	: Fast API, Gradio, Hugging Face

PROJECTS

1. RAG Chatbot | RAG Chatbot for analysing Documents and Q&A.

[GitHub Link](#)

- A RAG chatbot to answer questions from PDF and Excel documents using semantic search and embeddings.
- Integrated **OpenAI** model with **text-embedding-3-small** and **FAISS** for accurate, document-grounded responses.
- Implemented image analysis with automated report generation & text-to-image generation using Stable Diffusion APIs.
- Developed a clean, lightweight Gradio enabling document upload, chat interaction, and multi-modal AI workflows.

2. JOBHUB | "AI-Powered Job Matching Platform"

[Demo Link](#)

- Built an AI-driven resume analysis pipeline to extract skills and experience from PDF resumes using **NLP** models.
- Implemented semantic job matching and scoring by integrating AI inference with real-time job data from the **Adzuna API**.
- Enabled end-to-end automation for resume parsing, job retrieval, AI-based recommendations, and PDF report generation.

3. Smart Helmet | "Alcohol & Accident Detection Smart Helmet"

- Designed an IoT-enabled smart helmet using **ESP32** to monitor rider safety in real time.
- Integrated alcohol sensor and crash detection logic to identify unsafe riding conditions.
- Implemented **GPS**-based location tracking and **GSM** communication for automatic emergency alerts.
- Developed embedded firmware in C for sensor interfacing, data processing, and alert transmission

PROFESSIONAL EXPERIENCE

Software Developer Intern

Jan – Feb 2025

Nine pixels Info tech

Tirupur

- Assisted in developing and maintaining application features using modern programming languages and frameworks.
- Collaborated with senior developers to debug, test, and improve code quality.
- Implemented basic APIs and UI components under guidance, following coding best practices.
- Gained hands-on experience with version control, agile workflows, and real-world software development.

Software Developer Intern

Sep 2024

Gateway Software Solutions

Coimbatore

- Learned the fundamentals of software development and coding standards through hands-on tasks and mentorship.
- Assisted in writing and modifying basic application logic and UI components.
- Gained practical exposure to Git, issue tracking, and collaborative development workflows.

CERTIFICATIONS

1. **IBM** – Python for AI & Development

2. **NPTEL** – Internet of things 4.0

3. **UDEMY** – Generative AI with Langchain and HuggingFace, LLM engineering.

4. **GOOGLE** - Git & Github

5. **WIPRO**- Data Science

EDUCATION

BE Electronics and Communication Engineering

2022 - 2026

Nehru Institute of Engineering and technology. **CGPA:** 8.02/10

Coimbatore
